Summary

Results-driven Frontend Developer with a strong focus on creating intuitive and engaging user experiences. Passionate about crafting high-quality web applications that prioritize performance, accessibility, and responsiveness. Adept at collaborating with teams to deliver seamless digital solutions while continuously learning and adapting to new technologies. Committed to writing clean, maintainable code and improving development processes.

Education

University of Mansoura

Oct 2020 – May 2024

BS in Computer Science

- Grade: Good

Experience

Frontend Developer

July 2024 – Current

Jadara

- Building and designing the user interface of websites and web applications.
- Translate design mockups into interactive and responsive web pages.
- Optimizing performance to ensure fast load times and smooth interactions.
- Work closely with backend developers to integrate APIs and ensure seamless data flow.
- Cross-browser compatibility and mobile responsiveness are key aspects of work.
- Create an engaging and user-friendly experience that meets modern web standards.

Projects

Build Airbnb Clone

[github link](#) 

- Developed an Airbnb clone using Next.js, React, Tailwind CSS, and Mapbox, implementing modern web development practices.
- Built dynamic and interactive web applications utilizing Next.js App Router, TypeScript, and server components for optimized performance
- Integrated real-time mapping functionality with Mapbox, enhancing the user experience with location-based services.

Car Showcase

[github link](#) 

- Developed with Next.js and leveraging its server-side rendering capabilities, the Car Showcase website presents various car types, showcasing comprehensive information in a well-designed format with advanced filtering and pagination support for an enhanced user experience.
- Explore a wide variety of cars from around the world, utilizing a search and filter system based on criteria such as model, manufacturer, year, fuel type, and make.
- A seamless transition from client-side rendering to server-side rendering, enhancing performance and providing a smoother browsing experience.

Real Time Chat App

[github link](#) 

- Developed a real-time chat application using React, Tailwind CSS, and Daisy UI, ensuring a responsive and user-friendly interface
- Implemented authentication and authorization with JWT, enabling secure user access and seamless login experiences.
- Integrated Socket.io for real-time messaging and online user status tracking, enhancing interactive communication.
