

Mohamed Omar Sallam

Frontend Engineer (React | RN | Angular)

✉ sallammohamed453@gmail.com ☎ +201018410774 📍 Egypt 🔄 GitHub 🌐 LinkedIn

👤 Objective

Passionate and dedicated Frontend Engineer with over a year of experience in web development using React and mobile development with React Native. Eager to leverage my skills to create seamless, user-centric applications and contribute to innovative projects within a dynamic team environment.

📁 Professional Experience

Frontend Developer Intern

09/2024 – 12/2024

BlackStone eIT 📧

Remote, Seattle

- Collaborated with a cross-functional team to deliver a user-centric internal portal with modern designs, utilizing Agile methodologies for efficient task management and timely project delivery.
- Developed a dynamic, multilingual Angular application integrated with Strapi CMS, featuring interactive sliders, product cards, unique product pages, and APIs to showcase projects with snapshots, PDFs, and detailed information.
- Enhanced functionality and user experience by implementing key sections and features, including content displays and interactive elements, across both internal and client-facing parts of the website.

Software Engineer Intern

07/2023 – 09/2023

MAIN TELECOM 📧

6 October, Egypt

- Configured and optimized communication systems using 3CX and Call Flow Designer, resulting in a 15% improvement in system performance and 20% reduction in downtime.
- Integrated AWS and Google Cloud platforms to enhance text-to-speech and automatic speech recognition capabilities, increasing user interaction by 25%.
- Administered Vtiger CRM system, implementing web forms, workflows, and VT Calculus AI to boost sales efficiency by 20% and improve lead conversion rates. Developed a WordPress website with live chat integration, enhancing user engagement and support response time by 30%.

Frontend Developer Intern

03/2023 – 05/2023

Shahn App 📧

Smart-Village, Egypt

- Developed and implemented user-facing features using HTML, CSS, and JS to enhance the user experience.
- Timely debugging of interface issues across browsers and devices through methodical testing.
- Collaborated with product managers and UX designers, contributing to the design of reusable React components and implementing responsive design principles for optimal performance across mobile and desktop interfaces.

Projects

Readify

- Developed a community app that allows users to connect, share, and discuss books
- Implemented user authentication and database management using Firebase
- Integrated chat functionality with Gifted Chat
- Enhanced the user experience with animations and API integrations
- Optimized data fetching with TanStack Query
- Managed state with Context API for a seamless mobile experience

Movie Star

- Developed a comprehensive React Native app for both mobile and web platforms using Expo Router for file-based routing
- Styled the app with Tamagui
- Integrated the Movie Database API to display movie data
- Implemented persistent local storage with React Native MMKV
- Enabled users to save favorite movies

deliveroo

- Created a Deliveroo clone with geographic services using Google Maps.
- Added custom headers, bottom sheets, and modal animations with Reanimated.
- Designed scrolling menus, parallax headers, sticky segments, and section lists.
- Optimized state management with Zustand for a seamless user experience.

Data Finance

- Developed a finance website using Tailwind CSS with React
- Implemented text animations in the Hero component with the "React-Typed" package
- Used the useState hook for toggling the mobile side drawer menu
- Incorporated social icons with the "React-Icons" dependency
- Utilized both flexbox and grid layouts throughout the project

Sushi

- Developed a responsive sushi restaurant website using HTML5, CSS3, JavaScript, and Vite.
- Implemented animations, CSS variables, flexbox layouts, and BEM methodology for modular styling.
- Enhanced reusability and maintainability by rendering HTML through JavaScript and keeping an organized codebase.

Skills

MongoDB, SQL, Firebase, RESTful APIs, Debugging, HTML, CSS, SASS, Tailwind CSS, Bootstrap, JavaScript, JavaScript ES6, TypeScript, React, Next, React Native, Redux, Unit testing, JSON, Git, Problem Solving, OOP, communication Skills, Team player, Time Management, Presentation Skills

Education

Bachelor of Computer and Information

2020 – 2024

Tanta University 

Tanta, Egypt

Computer Science major
